

.406 Ventures Student Fellows Program

A Unique Opportunity for Student Entrepreneurs

Fellowship Background

The Student Fellows program is a unique opportunity for student entrepreneurs to build upon the academic entrepreneurial experiences offered through school with the real-world skills and networks needed to start successful companies. Over the two years each Fellow will build strong relationships with 15-20 other leading student entrepreneurs and experience the venture capital process.

All Fellows are required to have started a company and many are either working on a company when they join the Fellowship or start a company while an active Fellow. Recognizing the time constraints of student entrepreneurs, the Fellowship is designed to:

- Jumpstart Fellows' entrepreneurial endeavors: Through our partner program, as Fellows start companies, they will get assistance and \$10k+ in subsidies, discounts and deferrals with service providers including Amazon Web Services, Microsoft, Metis Communications, CBRE, Gunderson Dettmer & Square 1 Bank.
- Provide exposure to the capital community: In-depth interactions with the .406 partnership as well as access to our full network give students have the ability to understand, assess and engage the capital community when fundraising.
- Understand fundraising process: Fellows learn the fundraising process from within a venture fund as they sit on our Fellows investment committee and participate in everything from deal sourcing to due diligence.
- Facilitate entrepreneurial branding: Fellows carry .406 business cards and are coached on how to develop a brand as an entrepreneurial leader in their academic and local communities as they represent .406 Ventures on campus.

Establishing an Exclusive Network of Successful Entrepreneurs

The Fellowship is made up of successful entrepreneurs from elite universities:

 Babson	 Columbia	 Northeastern	 Tufts
 Boston College	 Dartmouth	 Olin	 UPenn
 Brown	 Harvard	 Princeton	 UNC
 Carnegie Mellon University	 MIT	 RPI	 Yale

Funded Companies Started By Student Fellows Include:

Interested undergrad & grad entrepreneurs send resume to Graham at
